1 .SUM,COUNT AND AVERAGE	**OUTPUT**
*Calculate the total price of all products in the dataset.	**=SUM(Electronic_db[Price ($)])**
*Determine how many products exist in the dataset.	**=COUNTA(Electronic_db[Product ID])**
*Calculate the average price of the products.	**=AVERAGE(Electronic_db[Price ($)])**
2 .MINIMUM AND MAXIMUM VALUES	
*Identify the minimum price among all products.	**=MIN(Electronic_db[Price ($)])**
*Identify the maximum price among all products.	**=MAX(Electronic_db[Price ($)])**
3 .LOGICAL FUNCTION- IF	
*Create a new column named Price Range.	
*Use the IF function to categorize products based on their price:	
○ If Price ≥ $500 → classify as High Price	**=IF(Electronic_db[@[Price ($)]]>=500,"High price","Standard price")**
○ If Price < $500 → classify as Standard Price	**=IF(Electronic_db[@[Price ($)]]<500,"High price","Standard price")**
4. Conditional Functions – SUMIF and COUNTIF	
*Use the SUMIF function to calculate the total price of products in the	
Electronics category.	**=SUMIF(Electronic_db[Category],"Electronics",Electronic_db[Price ($)])**
*Use the COUNTIF function to determine the number of products with a price	
less than $100.	**=COUNTIF(Electronic_db[Price ($)],"<100")**
5. Text Formatting – LEFT, RIGHT, MID	
*Use text functions to extract information from the Product ID column.	
*Create a new column named Day with the first 2 characters of each	
'Product ID' using the LEFT function.	
*Create a new column named Country Code by extracting the last 2	
characters from the 'Product ID' column using the RIGHT function.	
*Create a new column named Month by extracting the 4th to 6th	
characters from the 'Product ID' column using the MID function.	

1 .SUM,COUNT AND AVERAGE	**OUTPUT**
*Calculate the total price of all products in the dataset.	**10100**
*Determine how many products exist in the dataset.	**34**
*Calculate the average price of the products.	**297.0588235**
2 .MINIMUM AND MAXIMUM VALUES	
*Identify the minimum price among all products.	**30**
*Identify the maximum price among all products.	**1000**
3 .LOGICAL FUNCTION- IF	
*Create a new column named Price Range.	
*Use the IF function to categorize products based on their price:	
○ If Price ≥ $500 → classify as High Price	**Standard price**
○ If Price < $500 → classify as Standard Price	**High price**
4. Conditional Functions – SUMIF and COUNTIF	
*Use the SUMIF function to calculate the total price of products in the	
Electronics category.	**8050**
*Use the COUNTIF function to determine the number of products with a price	
less than $100.	**11**
5. Text Formatting – LEFT, RIGHT, MID	
*Use text functions to extract information from the Product ID column.	
*Create a new column named Day with the first 2 characters of each	
'Product ID' using the LEFT function.	
*Create a new column named Country Code by extracting the last 2	
characters from the 'Product ID' column using the RIGHT function.	
*Create a new column named Month by extracting the 4th to 6th	
characters from the 'Product ID' column using the MID function.
